Darrell Petras

Artificial intelligence (AI) and agriculture applications

Jennifer Dunn

Capital Gains and Succession Planning

Peter Johnson

Managing winter wheat in our climate

Peter Sikkema

Weed and herbicide management

Dear Fellow Producer:

We are pleased to announce that our **2025 PEI Soil and Crop: Taking Charge Conference** will be held in Charlottetown; we are also excited to have the Atlantic Grains Council as our partner and hosts of the PEI Department of Agriculture's **2025 Grain and Oilseed Workshop** on day 2, while the PEI Soil and Crop event will be day 1.

The agenda we have enclosed will provide you with conference topics, registration details, and costs. The ever popular Farmers Feast happens at noon each day; and we will have an evening program on Day 1 that is free to attend. To pre-register please visit atlanticgrainscouncil.ca/pei-conference-2025

Do not forget to visit our **Trade Show** and join us for the **Technology Forum** where agri-businesses will showcase innovative products or services.

We likely have only sent this agenda to one member of your farm - and that is yourself. Please feel free to inform family, friends and others you know about the conference. The agenda can also be found at peiscia.ca or atlanticgrainscouncil.ca.

Farmers always enjoy the social aspect of our conferences too. I hope your schedule will permit you to attend some or all of our 2-day event on February 19 and 20, 2025.

Sincerely,

John Hooper
President PEIS CIA
